Art Unit: 2652

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 2, 5-8 are drawn to a device having a loading mechanism with pivoting arms and guides on the arms, classified in class 720, subclass 623.
 - II. Claims 3 and 9-11 are drawn to a device having a loading mechanism with an encoder switch, classified in class 720, subclass 626.
 - III. Claims 4, 12 and 13, drawn to a device having a loading mechanism with a roller element, classified in class 720, subclass 621.
 - IV. Claims 14-20 are drawn to a method of using a device for detecting a position, classified in class 720, subclass 619.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each invention has separate utility such as pivoting arms and guides are the arms, utilizing an encoding switch and a loading mechanism with a roller element. See MPEP § 806.05(d).
3. Inventions I-III and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process for using, as claimed can be practiced with another materially different product such as one that does not exert a tangential force on the edge of the information plate.

Art Unit: 2652

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
